

English Bible History

Wycliffe through Tyndale

The fascinating story of how we got the Bible in its present form actually starts thousands of years ago, as briefly outlined in our **Timeline of Bible Translation History**. As a background study, we recommend that you first review our discussion of the **Pre-Reformation History of the Bible from 1,400 B. C. to 1,400 A. D.** which covers the transmission of the scripture through the original languages of Hebrew and Greek, and the 1,000 years of the Dark & Middle Ages when the Word was trapped in only Latin. Our starting point in this discussion of Bible history, however, is the advent of the scripture in the English language with the “Morning Star of the Reformation”, John Wycliffe.

The first hand-written English language Bible manuscripts were produced in the 1380's A. D. by **John Wycliffe**, an Oxford professor, scholar, and theologian. Wycliffe, (also spelled “Wycliff” & “Wyclif”), was well-known throughout Europe for his opposition to the teaching of the organized Church, which he believed to be contrary to the Bible. With the help of his followers, called the Lollards, and his assistant Purvey, and many other faithful scribes, Wycliffe produced dozens of English language manuscript copies of the scriptures. They were translated out of the Latin Vulgate, which was the only source text available to Wycliffe. The Pope was so infuriated by his teachings and his translation of the Bible into English, that 44 years after Wycliffe had died, he ordered the bones to be dug-up, crushed, and scattered in the river!

One of Wycliffe’s followers, **John Hus**, actively promoted Wycliffe’s ideas: that people should be permitted to read the Bible in their own language, and they should oppose the tyranny of the Roman church that threatened anyone possessing a non-Latin Bible with execution. Hus was burned at the stake in **1415**, with Wycliffe’s manuscript Bibles used as kindling for the fire. The last words of John Hus were that, “*in 100 years, God will raise up a man whose calls for reform cannot be suppressed.*” Almost exactly 100 years later, in **1517**, Martin Luther nailed his famous 95 Theses of Contention (a list of 95 issues of heretical theology and crimes of the Roman Catholic Church) into the church door at Wittenberg. The prophecy of Hus had come true! Martin Luther went on to be the first person to translate and publish the Bible in the commonly-spoken dialect of the German people; a translation more appealing than previous German Biblical translations. Foxe’s Book of Martyrs records that in that same year, **1517**, seven people were burned at the stake by the Roman Catholic Church for the crime of teaching their children to say the **The Lord’s Prayer** in English rather than Latin.

John Gutenberg invented the printing press in the **1450's** and the first book to ever be printed was a Latin language Bible, printed in Mainz, Germany. **Gutenberg’s Bibles** was surprisingly

beautiful, and **each leaf Gutenberg printed** was later colorfully hand-illuminated. Born as “Johann Gensfleisch” (John Gooseflesh), he preferred to be known as “Johann Gutenberg” (John Beautiful Mountain). Ironically, though he had created what many believe to be the most important invention in history, Gutenberg was a victim of unscrupulous business associates who took control of his business and left him in poverty. Nevertheless, the invention of the movable-type printing press meant that Bibles and books could finally be effectively produced in large quantities in a short period of time. This was essential to the success of the Reformation.

In the 1490's another Oxford professor, and the personal physician to King Henry the 7th and 8th, **Thomas Linacre**, decided to learn Greek. After reading the Gospels in Greek, and comparing it to the Latin Vulgate, he wrote in his diary, “Either this (the original Greek) is not the Gospel... or we are not Christians.” The Latin had become so corrupt that it no longer even preserved the message of the Gospel... yet the Church still threatened to kill anyone who read the scripture in any language other than Latin... though Latin was not an original language of the scriptures.

In 1496, **John Colet**, another Oxford professor and the son of the Mayor of London, started reading the New Testament in Greek and translating it into English for his students at Oxford, and later for the public at Saint Paul's Cathedral in London. The people were so hungry to hear the Word of God in a language they could understand, that within six months there were 20,000 people packed in the church and at least that many outside trying to get in! (Sadly, while the enormous and beautiful Saint Paul's Cathedral remains the main church in London today, as of 2003, typical Sunday morning worship attendance is only around 200 people... and most of them are tourists). Fortunately for Colet, he was a powerful man with friends in high places, so he amazingly managed to avoid execution.

In considering the experiences of Linacre and Colet, the great scholar **Erasmus** was so moved to correct the corrupt Latin Vulgate, that in **1516**, with the help of printer John Froben, he published a Greek-Latin Parallel New Testament. The Latin part was not the corrupt Vulgate, but his own fresh rendering of the text from the more accurate and reliable Greek, which he had managed to collate from a half-dozen partial old Greek New Testament manuscripts he had acquired. This milestone was the first non-Latin Vulgate text of the scripture to be produced in a millennium... and the first ever to come off a printing press. The 1516 Greek-Latin New Testament of Erasmus further focused attention on just how corrupt and inaccurate the Latin Vulgate had become, and how important it was to go back and use the original Greek (New Testament) and

original Hebrew (Old Testament) languages to maintain accuracy... and to translate them faithfully into the languages of the common people, whether that be English, German, or any other tongue. No sympathy for this “illegal activity” was to be found from Rome... even as the words of Pope Leo X's declaration that "the **fable** of Christ was quite profitable to him" continued through the years to infuriate the people of God.

William Tyndale was the Captain of the Army of Reformers, and was their spiritual leader. Tyndale holds the distinction of being the first man to ever print the New Testament in the English language. Tyndale was a true scholar and a genius, so fluent in eight languages that it was said one would think any one of them to be his native tongue. He is frequently referred to as the “Architect of the English Language”, (even more so than William Shakespeare) as so many of the phrases Tyndale coined are still in our language today.

Martin Luther had a small head-start on Tyndale, as Luther declared his intolerance for the Roman Church’s corruption on Halloween in **1517**, by nailing his 95 Theses of Contention to the Wittenberg Church door. Luther, who would be exiled in the months following the Diet of Worms Council in **1521** that was designed to martyr him, would translate the New Testament into German for the first time from the 1516 Greek-Latin New Testament of Erasmus, and publish it in September of **1522**. Luther also published a **German Pentateuch in 1523**, and another edition of the **German New Testament in 1529**. In the 1530’s he would go on to publish the entire Bible in German.

William Tyndale wanted to use the same 1516 Erasmus text as a source to translate and print the New Testament in English for the first time in history. Tyndale showed up on Luther's doorstep in Germany in 1525, and by year's end had translated the New Testament into English. Tyndale had been forced to flee England, because of the wide-spread rumor that his English New Testament project was underway, causing inquisitors and bounty hunters to be constantly on Tyndale's trail to arrest him and prevent his project. God foiled their plans, and in **1525-1526** the Tyndale New Testament became the first printed edition of the scripture in the English language. Subsequent printings of the **Tyndale New Testament in the 1530's** were often elaborately illustrated.

They were burned as soon as the Bishop could confiscate them, but copies trickled through and actually ended up in the bedroom of King Henry VIII. The more the King and Bishop resisted its distribution, the more fascinated the public at large became. The church declared it contained thousands of errors as they torched hundreds of New Testaments confiscated by the clergy, while in fact, they burned them because they could find no errors at all. One risked death by burning if caught in mere possession of Tyndale's forbidden books.

Having God's Word available to the public in the language of the common man, English, would have meant disaster to the church. No longer would they control access to the scriptures. If

people were able to read the Bible in their own tongue, the church's income and power would crumble. They could not possibly continue to get away with selling indulgences (the forgiveness of sins) or selling the release of loved ones from a church-manufactured "Purgatory". People would begin to challenge the church's authority if the church were exposed as frauds and thieves. The contradictions between what God's Word said, and what the priests taught, would open the public's eyes and the truth would set them free from the grip of fear that the institutional church held. Salvation through faith, not works or donations, would be understood. The need for priests would vanish through the priesthood of all believers. The veneration of church-canonized Saints and Mary would be called into question. The availability of the scriptures in English was the biggest threat imaginable to the wicked church. Neither side would give up without a fight.

Today, there are only two known copies left of Tyndale's 1525-26 First Edition. Any copies printed prior to 1570 are extremely valuable. Tyndale's flight was an inspiration to freedom-loving Englishmen who drew courage from the 11 years that he was hunted. Books and Bibles flowed into England in bales of cotton and sacks of flour. Ironically, Tyndale's biggest customer was the King's men, who would buy up every copy available to burn them... and Tyndale used their money to print even more! In the end, Tyndale was caught: betrayed by an Englishman that he had befriended. Tyndale was incarcerated for 500 days before he was strangled and burned at the stake in **1536**. Tyndale's last words were, "*Oh Lord, open the King of England's eyes*". This prayer would be answered just three years later in **1539**, when King Henry VIII finally allowed, and even funded, the printing of an English Bible known as the "Great Bible". But before that could happen ...
